

SharePoint and Internet Explorer 7

Question:

Ever since I upgade to IE7 this week, whenever I first launch my school's SharePoint or any SharePoint site, I need to log in.

Solution:

Check the trusted sites and make sure that the portal is there.

(tools, internet options, security tab, trusted sites -- copy both the 'studentportal.vbschools.com' & 'portal.vbschools.com' addresses.

This should do the trick.
